Checking Coding Conventions /3

- Block-style comments

/*

* This is a multi-line comment.

* Use when you need to write a long comment about a fragment

*/

Checking comments

- One-line comments

–/* C-style comments */

- use to put descriptive notes *before* a code fragment

–// C++ style comment
  - use at the end of the line, to describe variables or short pieces of code
  - also use for commenting-out code

- javadoc comments

– like block-style, but starts with /** instead

– use immediately before classes, methods, and fields
